

The first steps:

OUR EARLY YEARS' CLASSROOM PROGRAMS INCLUDE AGE APPROPRIATE ACTIVITIES WHERE STUDENTS EXPLORE AND DEVELOP SKILLS THROUGH IMAGINATIVE AND PURPOSEFUL PLAY, BUILDING THE FOUNDATION FOR THE FUTURE.

Students learn to communicate in groups and interact with other children and adults. Pre-reading skills are taught through songs and

actions, mathematics through practical fun activities and drama, art and music reinforce learning further. The trans-disciplinary themes of the PYP help make learning more meaningful and relevant. By

posing and solving problems, the themes serve as the lens through which students can inquire, make connections and begin to make sense of the world around them.
